- HTML
- CSS
- JavaScript
- PHP
- MySQL
- Sass
- Bootstrap
- Tailwind CSS

Projects

- **Music4U - The Music System**
  Designed and developed a dynamic Music Player website as part of a college project, utilizing frontend technologies alongside PHP. The application included a fully functional music library, an embedded audio player, and interactive UI components, all aimed at providing a seamless and engaging user experience.
- **Employee Management System**
  Employee Management System is a responsive web app built with ReactJS, APIs, and CSS. It allows admins to add, update, and manage employee records efficiently. The interface is clean, interactive, and optimized for smooth performance.
- **Fruit Sales**
  Fruit Selling Website is a user-friendly online platform built with ReactJS, APIs, and CSS. It lets customers browse, add fruits to the cart, and place orders seamlessly. The site is responsive, fast, and designed for a smooth shopping experience.
